

The color temperature of light and mood

Kelvin scale

Brainstorming spaces

Using a blue or cooler light in creative environments will keep its occupants invigorated and excited. Aim for a color temperature of 4600K or higher.

6500K

6000K

5500K

5000K

Conference rooms

Choosing light in the middle range, (from 3100K - 4600K) for conference rooms will help the audience feel alert and motivated.

4500K

4000K

3500K

Meeting rooms

To invoke a feeling of calm or create a sense of trust, use a warmer light temperature, less than 3000K, in meeting spaces.

3000K

2700K

2200K
