

The alignment represents one of Cisco's first to be focused solely on smart buildings and OT-IT integration -- bridging the gap between traditionally separate building systems and functions through comprehensive PoE solutions.

"Smart power is at the core of what we do. From energy optimization to integrated building systems, we are focused on creating environments that are more efficient, adaptive, and future-ready. We're excited to take this next step with Cisco, and we look forward to bringing powerful innovations to our partners and projects," said Erin McDannald, CEO of Environments.

Looking ahead, the Advisor Select partnership positions the two companies to continue pioneering the future of network integration and automation for workplace, education, healthcare, and retail spaces, as well as industrial facilities and data centers.

LightCorp Invests in Customer Experience with Major Revamp of Commercial Interiors Library for CET and SPEC

➔ LightCorp is excited to announce that their updated Commercial Interiors Library is now live on CET and Spec, bringing a new level of ease and efficiency to the specification process for designers and dealership partners. This update allows users to seamlessly integrate LightCorp products into floor plans, with instant access to visuals, product data, and list pricing—streamlining the path from concept to quote.

This initiative supports LightCorp's ongoing commitment to removing friction from the design and purchasing process while spotlighting the value of U.S.-made solutions that deliver fast, reliable performance.

"Our presence in Configura's Commercial Interiors Library is an important step in making our lighting, power, and accessory solutions even more accessible," said Chris Dawson, Marketing Manager at LightCorp. "We're

focused on being the go-to partner for designers and dealerships looking for customizable, high-performance workspace tools—with some of the fastest lead times in the industry.”

LightCorp’s CET presence reflects its broader mission to empower workspace professionals with functional, intuitive tools that enhance performance, support hybrid work, and bring good energy to every environment.

LightCorp’s Commercial Interiors Library update is now available and ready to support dealers, designers, and specifiers across North America both in CET and Spec software.

Anglepoise Introduces the 90 Mini Mini Desk Lamp in NEW Retro Colors

➔ The 90 Mini Mini Desk Lamp is the ideal mini lamp in three new bold and bright colors: turquoise blue, sunburnt orange, and avocado green. Perfect as a bedside table or desk lamp, and thanks to its compact size, it can fit on those tiny desks or in those smaller spaces.

Comes with a plug in adapter and usb cable, with an integrated, dimmable LED bulb that gives focused light for up to 20,000 hours. All of which makes the 90 Mini Mini one of our most versatile (and fun) lamps.

As part of Anglepoise’s 90th celebrations, this product has colors taken directly from the 1970’s Model 90. The 90 Mini Mini Desk Lamp has all the versatility and personality of a classic Anglepoise desk lamp wrapped up in its tiny form. At half the size of a standard desk lamp it’s designed to fit just about anywhere and is the perfect LED desk lamp for smaller spaces.
