LightCorp Launches CET Extension to Streamline Specification Workflows

The new extension helps dealers, designers, and A&D specifiers streamline project planning and specifications with access to LightCorp's complete portfolio.

➔ Designed to reduce friction throughout the design and specification process, the LightCorp CET Extension gives dealers, designers, and A&D specifiers a faster, more accurate way to incorporate LightCorp's lighting, power solutions, and accessories from their Most Modest brand, into their projects. The extension integrates directly into CET, helping users move efficiently from concept to specification and order while minimizing manual work and reducing opportunities for error.

“Our goal is always to make it easier for our partners to do business with us,” said Chris Dawson, Marketing Manager at LightCorp. “The LightCorp CET Extension gives dealers, designers, and specifiers direct access to our entire product catalog within the platform they’re already using every day. By reducing manual steps and improving specification accuracy, we’re helping our partners move projects forward with greater confidence and efficiency.”

The LightCorp CET Extension provides users with tools that simplify product selection, improve specification accuracy, and accelerate project development, including:

- Drag-and-Drop Product Placement – Quickly incorporate LightCorp products into layouts with intuitive, easy-to-use functionality.
- 2D and 3D Space Planning – Design and visualize spaces simultaneously to improve accuracy and streamline client presentations.
- Smart Product Logic – Built-in configuration rules help ensure products are specified correctly and are ready for ordering.

- Instant Pricing and Specification Data – Generate accurate pricing, bills of materials, specifications, and quotes directly within CET.
- Real-Time Product Updates – Access current product information, finishes, and pricing without manual updates.
- Improved Workflow Efficiency – Reduce repetitive data entry, minimize specification errors, and accelerate the path from design concept to completed order.

The LightCorp CET Extension is available now as a free download through the Configura Marketplace.
