

LOLA Power Sling

Installation Instructions

Included in the package:

- Lola
- Hardware Kit

Tools required:

- Pencil
- Drill
- 1/8" Drill Bit
- Philips Head Screwdriver

How to Install:

1. Decide location for the Lola product.
2. Mark surface for pilot holes. Holding the product in place, mark the appropriate number of pilot holes with the pencil. (Fig 1)
 12" product requires 2 holes, one on each side
 18" product requires 4 holes, two on each side
3. Using the 1/8" Drill Bit, drill pilot holes 1/2" deep at the marked locations.
4. Line the mounting holes on Lola up with the pilot holes. Using the Philips head screwdriver, drive screws into the holes to secure product in place. (Fig 2)

MAX Weight Limits:

- Do not load 12" product more than 5 lbs.
- Do not load 18" product more than 7.5 lbs.
