

Most Modest™

**silas**

storage planter

## silas

Designed initially as an easy-to-move planter solution, Silas evolved into this multi-tasking hero, capable of storing files or foliage alike. He features integrated rails inside to accommodate standard-sized hanging folders, and his perforated panel design adds a touch of industrial flair. Pair with accessories such as casters for effortless mobility, a wooden storage lid to stylishly conceal contents, or a plastic planter tray for water resistance. Available in seven textured finishes.

Designed by Jesse Hill.
