Standard Lead Time
Another added value that we are proud to offer our customers is dependable and fast order fulfillment. Our standard lead time for most products is 10 days from order acknowledgment.
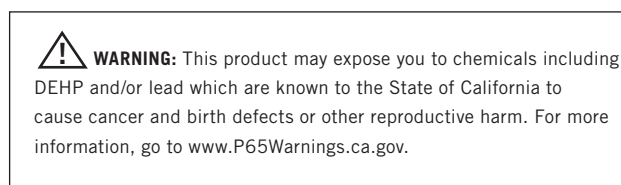

SWIFT SHIP
A select group of our products are now available to deliver as part of our Swift Ship Program which features a 5-day lead time from order acknowledgment. Products that qualify are listed below and are based on availability.

The listed lead times are for reference and are based on normal conditions that are subject to change at any time based on production schedules and component stock. To verify current lead times or for quantities greater than specified in the chart, please contact customerservice@lightcorp.com. If products of multiple lead times are ordered at once, they will all be sent at the speed of the product with the longest lead time.

Swift Ship Products	Max. Qty.	Swift Ship Lead Time
Piper	100	5-day
Reed Premier	400	5-day
Reed Premier w/ sensors	100	5-day
Nik	10	5-day

Information on California Proposition 65
California's Proposition 65 (Prop 65), also called the Safe Drinking Water and Toxic Enforcement Act, is a Right to Know law regarding Californians being able to make informed decisions to protect themselves from chemicals known to cause cancer, birth defects, or other reproductive harm. The law requires that all businesses provide a 'clear and reasonable warning' if one or more listed chemicals may be present within the product, even if in trace amounts. This warning must include at least one chemical present within the product. To comply with this law, a warning will appear on all LightCorp products in the form of a packaging label, in the following format shown below.

⚠ **WARNING:** This product may expose you to chemicals including DEHP and/or lead which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

LightCorp products may contain traces of one or more of the 900+ listed chemicals. Exposure to these chemicals may occur during installation and/or use of LightCorp products and may be negligible or well within the "no significant risk" range. However, based upon knowledge regarding the presence of one or more listed chemicals, LightCorp has chosen to provide a warning without conducting exposure levels per product due to its complexity.

Washing your hands after handling these products can reduce your risk of exposure. Exposure can include the following:

- Power supply cords, wiring and other parts made of PVC material may expose you to chemicals including phthalates like DINP, DEHP and/or lead

- Product switches, lens material or other plastic parts, may expose you to chemicals including bisphenol A, phthalates like DINP, DEHP and/or polychlorinated biphenyls (PCB)

- Unpainted galvanized sheet metal parts, present on some underbin products and/or mounting brackets, may expose you to chemicals including lead and/or nickel

- Powder coat paint, although cured during the painting process, may expose you to chemicals including bisphenol A, nickel oxide, 2-mercaptobenzothiazole, 2-methlimidazole, carbon black and/or titanium dioxide. (Exposure to paint chemicals exists only if the paint were to flake or the product was sanded and particles were to become airborne)

- Fluorescent lamps, when broken, can expose you to chemicals including mercury

For more information, go to http://www.P65Warnings.ca.gov.

Capabilities Statement

COMPANY SUMMARY

LightCorp delivers a robust range of lighting and power products for government agencies. For over 30 years, we've put all our energy into understanding how lighting empowers a person's work, influences their mood, and helps them focus. We love the beauty of it, the science behind it, and its impact on everyday life. It is this passion that defines everything we do and drives us to create vibrant, colorful, and imaginative solutions that brighten the world where we live and work.

LightCorp is a GSA contract holder with the capability and capacity to serve government agencies. We offer highly functional, environmentally friendly products that are TAA compliant and assembled in the U.S.A., giving federal, state and local agencies the value and performance required for life cycle efficiencies.

MANUFACTURING PROCESS

LightCorp manufacturing processes are lean, reliable, flexible and proven; our highly functional lighting products are built to last and delivered on time. We implement high standards through an ISO 9001 certified Quality Management System. Additionally, ISO 14001 certified Environmental Management System ensures our manufacturing and disposal processes are environmentally sound.

PRODUCT DEVELOPMENT

Our product development process includes rigorous procedures that result in short lead times and smart products that last. LightCorp employs the agile methodology of Scrum project management to oversee critical steps, from ideation through launch.

CAPABILITIES

Office Lighting & Power Distribution Products: LED task and personal task lighting products that balance illumination and glare and desk-mounted units offering AC and USB power.

Ordering notes:

- Each unit Includes two cord managers. Addtional cord managers are available for purchase.

- Custom configurations available. Please contact Inside Sales at 800.526.5658 for more information and estimate on lead time.

- Power strip cords will match finish color of the power strip.

- Not intended for interlinking. Plugging other power units or extension cords into the AC receptacles may violate your local electrical code.

- AC receptacles on the Nik unit can be specified with the default south orientation (ground pin down), or specified to be rotated north-facing (ground pin up), east-facing (ground pin on the right), or west-facing (ground pin on the left).

- The Nik unit features a straight strain relief as standard. A 90° angle is also available. Please contact Inside Sales at 800.526.5658 to specify.

- AC receptacles are not able to be custom painted.

- The clamp mount on the Nik unit applies to surfaces 0.75"–1.25" thick.
