

LIGHTCORP

LIGHTING LOOKBOOK

Our collection of energy-enhancing lighting
solutions for the office and home.

GOOD ENERGY.

LightCorp is more than a lighting and power manufacturer. We're a people-first company that's passionate about creating better work environments. We believe wholeheartedly that properly lit, fully-connected workspaces are essential to people's well-being. Our thoughtfully designed and sustainably engineered products are vital to creating a more personalized, functional, and energetic work environment. Environments enhanced with our products improve mood and overall happiness, allowing people to thrive and bring their best energy to work.

VOYAGE

Voyage unites functional ergonomics and timeless aesthetics with its full articulation, extended reach, and dimmable touch technology.

LIGHTCORP

Available with:

- Single or double arm
- Dozens of finish colors
- Multiple mounts, including USB charging base
- Optional occupancy sensor

www.lightcorp.com

REVO

Revo seamlessly bends, tilts, and turns—just how you want it. Available in single or double arm, in dozens of finish colors, several mounting choices, and with optional occupancy sensor and USB charging base.

LIGHTCORP

TINO

Tino delivers brilliant illumination and comes standard with energy-saving features such as auto shut off and occupancy sensing.

Short on space? Free up desktop real estate with the monitor mount option.

MACK

Mack gracefully folds, bends and twists to articulate an impressive 350-lumen output to wherever you need it most. Or for a softer intensity, use its intuitive slide-touch control pad located on the base.

LIGHTCORP

PIPER

Comprised of a three-step soft-touch dimming interface and selectable color temperature, Piper provides a spectrum of illumination from warm to cool. An integrated USB port is housed in its base, making for readily-accessible electronic charging.

REED PREMIER

Our best-selling under shelf light features multiple state-of-the-art energy-saving components such as touch-and-hold continuous dimming, 10-hour automatic turn off, and an optional integrated occupancy or vacancy sensor that knows to turn on only when you need it to.

- 5 interlinkable sizes
- Standard or high output
- Touch-control dimming
- Optional occupancy sensor

- 4 interlinkable sizes • Master control • Touch-control dimming

LIGHTCORP

TUCK

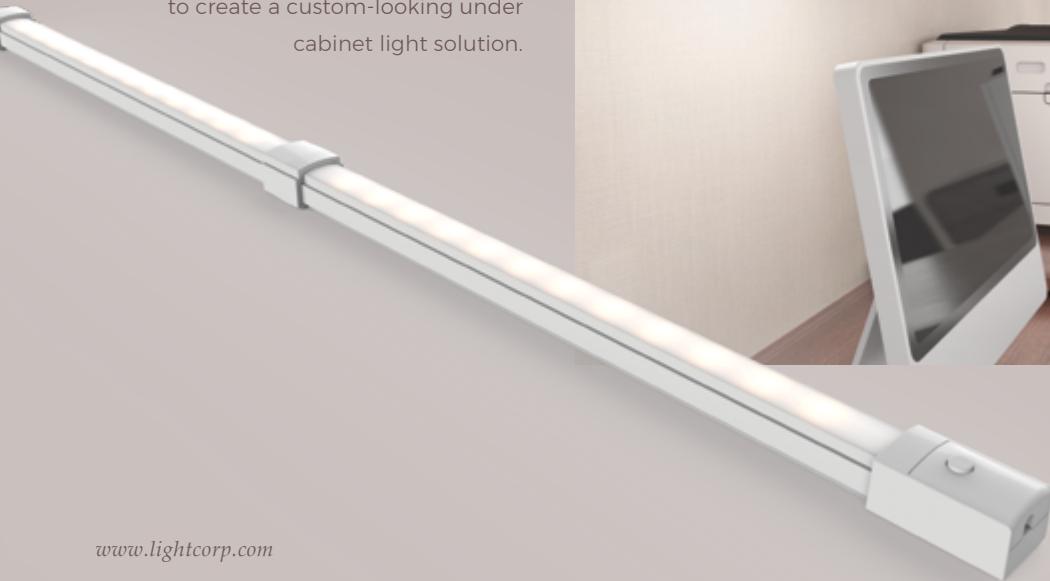

Designed to attach directly beneath underbin cabinetry, Tuck's slim profile mounts effortlessly and inconspicuously below cabinets and shelving to provide superb quality illumination to work surfaces.

www.lightcorp.com

CLIQUE

Compact in design, these modular units easily connect to one another to create a custom-looking under cabinet light solution.
