## #GoodEnergy

LightCorp is more than a lighting and power manufacturer. We're a people-first company that's passionate about creating better work environments. We believe wholeheartedly that properly lit, fully-connected workspaces are essential to people's well-being. Our thoughtfully designed and sustainably engineered products are vital to creating a more personalized, functional, and energetic work environment. Environments enhanced with our products improve mood and overall happiness, allowing people to thrive and bring their best energy to work.

### Our technology. Your design.

What sets our power system apart from the rest is your ability to customize it inside and out. From the type and order of the power ports, to the way it attaches to the desk, to the dozens of color options available—the combinations are almost endless.

Looking for a deeper level of customization (such as alternative faceplate or housing geometry)? We can do that, too! Give us a call to discuss your needs at (800) 544.4899.

### Where it's made matters.

LightCorp's power products are designated TAA and are manufactured in our Grand Haven, MI factory. Orders are processed within 24 hours and standard lead time for most products is 10 days from order acknowledgment.

**Have questions or need more information on our products?**

We're happy to help! Contact us at (800) 526-5658 Monday through Friday from 7:30 AM—5:00 PM (EST) for assistance.
